LinkedIn: [linkedin.com/in/nikash-k-r-234635391](https://www.linkedin.com/in/nikash-k-r-234635391)

Profile

Passionate AI & Data Science student with strong interest in artificial intelligence, game development, UI/UX design, and modern web technologies. Skilled in Java, Python, HTML, CSS, and JavaScript with experience building interactive applications and problem-solving projects.

Education

B.Tech in Artificial Intelligence & Data Science

CGPA: 8.35

Skills

- Java
- Python
- HTML
- CSS
- JavaScript
- UI/UX Design
- Game Development
- Artificial Intelligence
- Data Structures
- Figma
- Visual Studio Code

Projects

Movie Ticket Booking System

Developed a Java-based ticket booking system using ArrayList and OOP concepts. Implemented booking, cancellation, searching, and ticket management features.

Student Marks Manager

Built a Java application using HashMap for efficient student record management with CRUD operations and fast data retrieval.

Python Dice Game

Created a multiplayer dice game using Python with score tracking, random number generation, winner detection, and replay functionality.

Certifications

- Microsoft Applied Skills – Create and Manage Canvas Apps with Power Apps
- freeCodeCamp – Responsive Web Design
- Anthropic – AI Fluency Framework
- LEAP / IIT Madras Incubation Cell – Automation with Arduino

Interests

Artificial Intelligence, Game Development, UI/UX Design, Gaming Mechanics, Web Development, Futuristic Technologies
